

5 Megapixel CCD Camera for Microscope

MCX511

Description

MCX511 is 5 megapixel professional grade CCD microscope camera equipped with high quality Sony CCD ICX282. With a 16Mb buffer memory, It offers progressive scan, high frame rates (20 frames per second). Thanks to a large format 2/3" CCD sensor, the MCX511 offers a large field of view. The robust multi-camera synchronization function makes it easy to work with 3 more Pixit cameras together. The CCD design ensures high-uniformity sensor output, a wide dynamic range and a lower noise environment, ideal for bright field microscopy applications.
